Commitment of the agence nationale de la sécurité des systèmes d'information director

Our 3 fundamental objectives, in term of quality of the certification activity are:

- ensure impartiality and rigor of our methods;
- maintain confidentiality of details provided within the scope of the evaluations;
- ensure conformity of our activities with international standards in order to guarantee recognition of our certificates outside of our borders.

I commit to enforce required means in the achievement of these objectives and I will monitor that dispositions set in the quality manual and the relative documentation are applied.

Theses dispositions includes the effectiveness and relevance of the quality system, in order to allow continuous improvement: the information technology security is a fast moving and constantly evolving topic, therefore, anyone shall contribute to the adaptation of the uses.

Actions initiated will be reviewed during the management meetings, where the quality roadmap will be analysed in order to set objectives to reach. Quality shall improve in the technical and administrative areas. This commitment involves the entire staff of the certification body.

I will entirely support the certification body to reach the objectives set. The sub-director of the Expertise sub-directorate has been appointed to assist me in this task and I have delegated the operational management of the quality system to the certification body manager.
